Voltage / Power	12/24V / 10W
Dimensions	90x90 mm
Connection	Deutsch 2 pin
Assembly	M8 screws
IP protection	IP69K
Approval	CISPR25 Class 3

The BLUE Prime is designed to increase the efficiency of boom sprayer work - in dark, in fog and during low visibility. The innovative construction is using polycarbonate, crystal LED lenses that generate strong and long blue light beam. The lighting provides excellent visibility along the entire length of the boom sprayer.

High resistance to various weather conditions is confirmed by the IP69K protection class. Additionally, the worklight housing is covered by a special varnish coating that protects against UV radiation and scratches. The highest quality materials guarantee increased durability and failure-free operation for a long time.
