Here's the smallest fog headlight you'll see

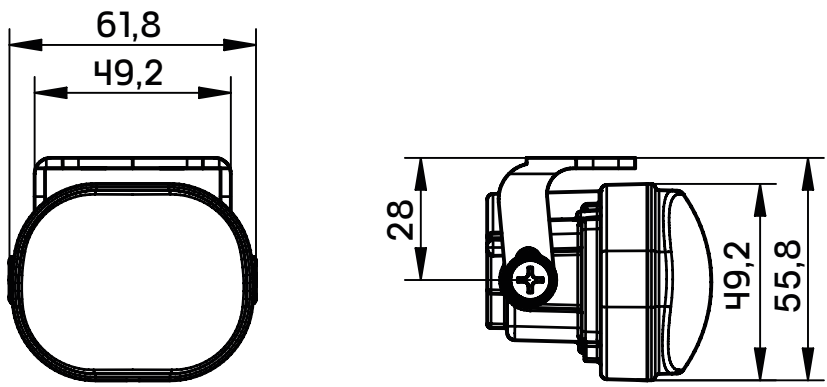

LED fog light

Model FXQ4

Technical data

Catalog number:	OEI132003421
Source of light:	LED
Voltage:	9-33 V
Dimensions:	62x50 mm
Connection:	Cable
IP rating:	IP67
Approvals:	ECE R10 R19

Here's the smallest fog headlight you'll see.

The main role of fog lamps is their important function: to give light per homologation requirements, in a way that effectively breaks up the fog, does not dazzle, and is focused on the road and the side.

The fog headlight, with its unobvious shape, is perfectly compatible with all headlight solutions.

The advantage of the design from is that the FXQ4 can be combined with both round and rectangular headlights. Minimalist design is desirable. One that will not stand out against the background of the body, but will even blend into the body of the vehicle.
