

SERIES XTQ

XTQ2 - 3000 K

XTQ1 - 5700 K

Safety and efficiency: this is the mission of XTQ_Series worklights. Their outstanding durability and resistance to damage allow for use in even the most extreme conditions. The worklights are used in the heavy machinery industry, on construction sites or mines.

XTQ_Series models have the highest IP69K protection and vibration resistance of 60G. The worklights use less power and generate a much brighter beam of light.

In addition, the XTQ2 model have a warm color temperature of 3000 K, which is more effective in dusty and foggy environments. It helps to stay focused while working and does not cause eyes strain.
